PLAYER PROTOCOLS

- Embrace the cyberpunk life.
- Go into danger, fall in love with trouble.
- Use your Stress (Push, Assist, Resist).
- Act now, plan (with Flashbacks) later.
- Build your character through play.
- Ask questions when in doubt, to bolster the fictional circumstances or just to satisfy your curiosity.
- Take responsibility as co-author of the game with the Game Moderator.
- Play to find out what happens.

FILE A RUNNER

01. Enter a Handle—what they call you on the Grid and streets alike.

02. Enter a few evocative words to describe your Look.

03. You risk it all for a reason. What's in it for you? Choose an Angle and detail it briefly.

04. Assign ⊞⊞, ⊞, and ⊞ in any order to three of your Approaches.

05. Distribute 8 dice over your Skills. To assign an Expertise, spend a third die on a particular Skill—choose or write the Expertise down aside.

06. Body modifications of all types—Cybernetics, Biotech and others—are widely adopted among Runners. Define your starting Signature Augmentation by writing down its model/brand and an outline of its primary feature, *e.g. Ashide™ Racing Legs*.

    While taking action or resisting Consequences, you can mark ◆ or SPECIAL RESISTANCE to leverage your Augmentation into it.

    During the Run, you may declare additional Augmentations or extra functionalities of existing ones as UPGRADES (panel 8).

07. Don't pick your Gear just yet—you'll decide what you are carrying on the fly during the Run. For now, just circle on the list the ones you are interested in, for easy referencing later.

LOAD

SPECIAL ACTIONS

[X/FITDB1522]

PUSH
Mark ◆◆ OR add a Glitch to either ⊞ to your roll OR Increase Effect OR Act when OUT.

ASSIST
Mark 1 Stress and expose yourself to the Consequences to ⊞ to a teammate's Action Roll. Only one PC may assist any given roll.

SETUP
Make an Action Roll to give an EDGE to yours or anyone else's future Actions. *E.g. provide cover, distract an enemy, plant evidence etc.*

LEAD GROUP
All participating PCs roll for the same Action and pick the best result among them. They all share the outcome, but the leader marks ◆ for each FAILURE.

PROTECT
Take or Resist a Consequence in place of a teammate.

FLASHBACK
Declare to have taken action in the past to impact the current situation—as long as you don't "undo" something already established. The action is handled just like any other and may call for a roll if danger or trouble are involved. Also, the GM sets a Stress cost depending on its plausibility:

◆: A standard activity, likely to have occurred.

◆◆+: An elaborate plan involving unlikely factors.

TAKE A BREATHER
Describe how the fiction provides you with an opportunity to unwind—*gather your thoughts, take a pill, turn up the volume, punch a wall, check in with a loved one, patch yourself or a teammate up.* Roll the appropriate Approach (do not add a Skill), ⊞ if you bring out your ANGLE, ⊞ if you deplete appropriate Gear:

> 6,6 YOU'VE BEEN THROUGH WORSE. CLEAR ALL ◆ -OR- IGNORE BOTH LEVELS 1 AND 2 HARM PENALTIES FOR THE REMAINDER OF THE RUN.

> 6 THAT SHOULD WORK. CLEAR ◆◆◆ -OR- IGNORE EITHER LEVEL 1 OR 2 HARM PENALTIES FOR THE REMAINDER OF THE RUN.

> 4/5 SUCK IT UP. CLEAR ◆◆ -OR- IGNORE LEVEL 1 HARM PENALTIES FOR THE REMAINDER OF THE RUN.

> 1-3 TAKE WHAT YOU CAN GET. CLEAR ◆.

ASSETS/UPGRADES

[X/FITDB1522]

Call for a FLASHBACK to establish how you acquired it:

ASSETS Vehicles, experts, safehouses or data. *E.g.: cyberdeck program, building's blueprint, info broker.*

AUGMENTATIONS Additional body enhancements with different features from previous ones.

UPGRADES Enhance a Gear to High-Grade or add an extra feature to a Gear, Augmentation or Asset already in use. *E.g.: Heat-seeker projectiles; Armored wheels; Self-repairs with nanobots; Elite street doc.*

Reduce the Flashback's cost when declaring an Asset, Augmentation or Upgrade by picking a fitting DRAWBACK:

- It's large and/or heavy. Mark 1 or 2 EXTRA LOAD.
- It is unstable or damaged beyond repair (e.g. an obsolete augmentation, corrupted program, makeshift weapon). Mark it as GLITCHED.
- It was never really paid for and now you are being HUNTED. Who sent them after you and what for? Whenever you attract unwanted attention, it may be their Hunter pinning you down.
- You've made a promise or cut a deal. Name your patron/sponsor and mark a DEBT.

ACTION ROLL SUMMARY

When your Runner faces a risky or troublesome situation, make an **ACTION ROLL**:

01. Describe what they want to accomplish and what Approach, Skill, and any other factor (gear, augment, environmental aspect) they will employ to do so.

    There is no "wrong" approach to a situation, but some may be less effective or result in more severe consequences—in those cases, you are encouraged to rethink the course of action to improve your positioning.

02. The GM assesses the risk (Threat T) and tells you what are the probable Consequences if they fail, as well as how much they can accomplish (Effect E) on a success.

03. You can then raise both T and E together to improve their Effect at the cost of a worse Consequence or vice-versa.

04. Finally, gather your dice:
    - A number equal to Approach+Skill ratings.
    - Add bonus dice from Push and/or Assist.

⚠ If ending up with zero or less dice, you must roll two dice and keep the lowest.

05. Roll all your dice at once and read the **single highest result**, judging the outcome by the table below.

    Work together with the GM narrating the action, but the latter has final say over the outcome and is the one declaring eventual Consequences.

6, 6	Critical. They succeed and gain an extra benefit (▲E, uncover a secret, improved position, pinpoint a bounty).
6	Success. It goes as well as intended.
4/5	Partial Success. Success, but it comes with a Consequence.
1-3	Failure. Things go bad as they fail and also suffer a Consequence.

GLITCH DICE

Each **GLITCHED** factor used on an Action Roll replaces a normal die with a GLITCH die—use a die that's easily discernible from the rest.

After judging the outcome as usual, read the lowest GLITCH separately. On a **1-3**, it triggers a further Level 2 Consequence that can't be Resisted; on a **4/5**, the additional Consequence can be Resisted normally.

APPROACHES

ACTION / HOW

AGGRESSIVE	FORCE INTIMIDATION DESTRUCTION	HESITATION	GLITCHED
SMART	CREATIVITY CUNNING PERCEPTION	DISORIENTATION	GLITCHED
EMPATHIC	CHARISMA LEADERSHIP DIPLOMACY	APATHY	GLITCHED
STEALTHY	DISCRETION SUBTERFUGE SECRECY	RECKLESSNESS	GLITCHED

SKILLS

ACTION / WHAT

EXPERTISES don't add ⊞ to a roll, but allow you to trade ⊞ for an EDGE—and vice-versa—when they are applicable.

ANALYZE	PEOPLE, SITUATION, INFORMATION
ATHLETICS	SPRINT, PARKOUR, SWIM, CLIMB
CLOSE COMBAT	BRAWLING, WEAPON:
CODING	HACK, COMPILE, MINE, SCRAMBLE
INFLUENCE	PERFORM, NEGOTIATE, INTIMIDATE
PILOTING	CARS, BIKES, CHOPPERS, DRONES
RANGED COMBAT	PISTOL, RIFLE, SMG, THROWING
RIGGING	ELETRONICS, ROBOTICS, HEAVY M.
SCIENCES	BIOTECH, PHYSICS, CHEMISTRY
STREETWISE	POLITICS, MARKET, NAVIGATION
ATTUNE△	SPIRITS, ARTIFACTS, PLACES

△*Refer to the +Weird /plugin to learn about this Skill.*

AUGMENTATIONS

ACTION / ENHANCED BY

Mark ◆ to activate an enhanced capability (*e.g. therma-vision, wired reflexes, augmented strength*) or produce/conceal an specific compact asset (*chemicals, blade, nanobots*). Can be combined with a Push.

Mark SPECIAL RESISTANCE to wield it against a fitting type of Consequence (*e.g. neural firewall, behavioral analyzer, toxin neutralizer, fireproof coating, etc*).

- GLITCHED
- GLITCHED
- GLITCHED

LOAD/GEAR

ACTION / USING

During the Run you may declare gear on-hand by marking it on your list-up to a number of items equal to your LOAD level. If an item is depleted, destroyed, or lost, cross it off the list.

◇ LIGHT [3]	Move freely, blend in easily.
◇ MEDIUM [5]	Look ready for a job.
◇ HEAVY [7]	Loud or slow, very conspicuous.

- ◇ A BLADE OR TWO
- ◇ SIDEARM
- ◇ SUBMACHINE GUN
- ◇ ◇ LARGE/HEAVY WEAPON
- ◇ TRACKING DEVICE
- ◇ CYBERDECK
- ◇ SMALL DRONE — STEALTHY OR SWIFT
- ◇ ◇ MEDIUM DRONE — TOUGH OR OFFENSIVE
- ◇ SPARE BATTERY
- ◇ MEDKIT
- ◇ DISGUISE OR CAMO
- ◇ ARMOR
  - ◇ ◇ +HEAVY
- ◇ INFILTRATION GEAR
- ◇ EXTRA AMMO — STANDARD / PIERCING / EXPLOSIVE / INCENDIARY
- ◇ SURVIVAL KIT □□□ — MASK, RATION, WATER/AIR PURIF.
- ◇ GRENADES □□ — EMP / GAS / STUN / INCEND. / FRAG.
- ◇ ◇ DEMOLITION TOOLS
- ◇ MICROTRONICS TOOLS
- ◇ SPARE PARTS
- ◇ ◇ ◇ ◇ EXTRA LOAD

⚠ Gear and Augmentations are Mid-Grade by default. When comparing gear between opposing sides, the highest-graded model has an EDGE for their better features. UPGRADE gear with FLASHBACKS (panel 8).

STRESS

[1 / FITD015227]

PUSH: ◆◆ / ASSIST: ◆ / FLASHBACK: ◆ OR ◆◆+ (panel 3)

OVERLOAD When you mark your last ◆, an Approach of your choosing becomes permanently **GLITCHED** and immediately incurs a complication, such as:

- You are taken out of action.
- You expose the team's weakness.
- You make the team lose an advantage.
- You damage or overlook something crucial.

While OVERLOADED you can't perform actions that would require ◆. TAKE A BREATHER (panel 3) to relieve ◆ and clear this status.

RESISTANCE/ARMOR

[2 / FITD015227]

Convey how you are **RESISTING** to reduce the severity of a Consequence or, at the GM's discretion, avoid it entirely. Then choose a method:

MARK AND DEPLETE EITHER:

◆ SPECIAL RESISTANCE
E.G. Envision a defensive use for your Augmentation.

OR

A FITTING TYPE OF ARMOR
What does it look like?

ROLL THE APPROPRIATE APPROACH (DON'T ADD SKILL THIS TIME), ⊞ IF YOU OPT TO DEPLETE A RELEVANT GEAR:

> 6,6 2EZ. THAT'S IT.
> 6 SOLID. MARK ◆.
> 4/5 NOT BAD. MARK ◆◆.
> 1-3 CLOSE. MARK ◆◆◆.

HARM

[3 / FITD015227]

If you take Harm of a Level already filled, move it on to a greater Harm Level. Whenever a HARM would hinder an action, apply its designated PENALTY—when **OUT**, you can act only if ASSISTED or making a PUSH.

LEVEL / DESCRIPTIVE	PENALTY
1	▼E
2	−
3	OUT
TIME TO DIE.
